Dethleffs
A friend of the family

Arist Dethleffs invented caravanning in 1931

So he could always have his family by his side on business trips, Arist Dethleffs invented the first “Wohnauto” caravan, inspiring a whole new type of holiday. The horsewhip and ski pole maker’s innovation was a pioneering achievement in a success story that continues to be written to this day.

Not without
my family!

An idea goes into production

Wherever the Dethleffs family headed in their caravan, curious people surrounded the vehicle. The prototype generated a lot of interest and gained more and more followers. The idea turned into a company, and the company became an entire leisure and holiday industry.

“ARIST DETHLEFFS TURNED AN IDEA INTO A MOVEMENT. HIS PIONEERING SPIRIT LIVES ON AT DETHLEFFS AND HAS SINCE THRILLED MILLIONS.”

Dethleffs

Alexander Leopold
President

90 years of experience, reliability & service

Welcome to the Dethleffs feeling

A Dethleffs recreational vehicle feels good from the very first moment. Because our products feature great quality as well as great prices. Our service team does everything to ensure our customers have sensational holiday experiences on the road, while the product range offers the right vehicle for every situation and every need.

Heading into the future with a pioneering spirit

Our plant in Isny im Allgäu is one of the most cutting-edge production sites for recreational vehicles in Europe and has always been committed to the highest quality standards. More than 55,000 camper vans have been developed and produced here over the past 17 years.

30 ha
State-of-the-art

More than 90 caravan
and motorhome models
for unique holiday
moments on the road.

The new Globevan – the new friend of the family.

Dethleffs enters a new segment with the Globevan: urban campers. These compact vehicles are equally ideal for everyday family use and for camping trips – a Dethleffs for every day.

Dethleffs have been developing and manufacturing urban campers and camper vans for 17 years. The longstanding experience from more than 55,000 vehicles produced went into the development of the Globevan.

Clever details, a high level of flexibility for everyday and leisure use – with the usual Dethleffs quality of course. Look forward to the new urban camper from Dethleffs.

Globevan

The new Globevan. The Dethleffs for every day.

roof rails on both sides

reversing camera and towbar

16" alloy wheels

Extensive standard features

pop top roof with panorama
function and two berths

130 HP 6-gear manual transmission

bi-xenon headlights on the Camp Two version

70 l fuel tank

bumpers and external mirror painted in vehicle colour

FEATURES

Comfort & safety

Long journeys and everyday city traffic: Anyone who drives their vehicle a lot attaches great importance to modern safety and assistance systems as well as comfortable and convenient equipment. The Dethleffs Globevan features an extensive standard package.

1 Integrated control panel and audio remote control on the steering wheel, Lane Assist with Driver Alert and High Beam Assist, Emergency Brake Assist including emergency brake light, Hill Start Assist, Park Pilot System at front and rear

2 Ford audio system with DAB+, reversing camera with image transmission of the rearward driving path on the multifunction display, air conditioning including dust and pollen filter

3 Control panel and state-of-charge indicator for the living room battery, diesel parking heater

4 Additional USB ports, 12 V and 230 V sockets supply sufficient energy at all times

1

INTERIOR

Space sensation

The lounge or bedroom has four berths and a comfortable, wide sleeping area for outings with family and friends.

- 1** Together with the sleep bench and the rotating front seats, this creates a generously sized living area with full standing height.
- 2** The airline rail system allows variable positions of the sleep bench. The 140 cm wide sleeping area sets new standards.
- 3** Two storage boxes attached with knurled screws offer plenty of space for everything that has to be easily accessible and can also be used as stools outside of the vehicle.

**Compact camper.
Great freedom.**

6-5-4-3-2 in one

Flexible and versatile. Two to six seats for everyday life or plenty of room for hobbies and moving house.*

1 6-seater for friends, friends of friends, young and old football fans, days out with the whole family*

2 5-seater: When you need that extra seat*

3 4-seater: The standard setup with four seats and four berths

4 2-seater: The sleep bench and seats can be removed easily and create a large storage space even for unusual hobbies.

* Regarding the availability of a 5th and 6th seat please contact your Dethleffs dealer: www.dethleffs.com/dealers

At home anywhere.

Stay where you like it best. Whether a spontaneously extended day out, a long weekend that should not be wasted by staying in the city or that long-awaited journey south – clever solutions ensure relaxed feel-good moments.

1 A pull-out gas burner in the rear with piezo igniter – space-saving and always ready for preparing coffee, tea or a delicious meal.

2 A 32-litre compressor cool box (cooling and freezing) can also be used outside of the vehicle thanks to the adapter plate. As an alternative, there is enough space here for two storage boxes.

3 A 95 Ah living room battery and an 1.8 l gas bottle in space-saving storage ensure independent camping pleasure.

4 The space under the sleep bench extension offers plenty of space for luggage, shopping and all those things you always need with you.

5 Unusual in this segment and very convenient – the outdoor shower with 16 l tank.

6 A camping table concealed on the right-hand wall turns the lounge area in the vehicle into a dining room in no time at all. But ideally, the three-legged table should be used wherever you have the best view.

The new Globevan. Enough space for any hobby.

Flexible space options make the Globevan a highly versatile vehicle. Clever details prove every day that our designers know how to optimise the use of space.

Would you like some more?

Dethleffs Original Accessories offer clever camping gadgets and the perfect accessories for your Globevan. Tailor your vehicle to suit your personal needs so that you can always feel at home on the road.

1 Awning with bracket for sunny days

2 The rear pocket is nothing less but a textile wardrobe: With numerous storage compartments and an integrated blind for the rear window, this original accessory is a true multi-talent. When it is not in use, the pocket can be stretched away flat.

3 An additional luggage net under the headliner makes optimum use of all existing storage options.

4 The thermal insulation and window blinds for the entire vehicle keep prying eyes out and cosy temperatures in.

5 Topper for the lower sleeping area – more comfort for relaxed nights

6 Lashing eyes keep cargo where it belongs.

7 The roof carrier system consists of a base rail and roof carrier, for up to 50 kg of additional load.

8 The bicycle carrier for the tow bar can optionally hold up to four bicycles.

Find more accessories for your Globevan online at www.dethleffs-original-zubehoer.com/en

Dethleffs partner network. Close and personal.

Well over 300 Dethleffs dealerships offer professional advice and expert help when you need it. And the spare parts service can ensure that the right spare parts are delivered to the right place overnight.

Dethleffs customers have appreciated this outstanding service for decades. After all, we have always taken customer service literally.

**Specifications subject to change without prior notice.
Errors excepted.**

Some of the images in this catalogue show decorative elements that are not included in the delivery as well as optional extras and accessories not included in the starting price. Your Dethleffs dealer will be pleased to provide you with information on technology, equipment and prices. Colours may deviate due to printing technology.

The weight of the vehicle in running order as per Regulation (EU) 1230/2012 includes the unladen weight of the vehicle (vehicle dead weight including the driver [75 kg] and fuel tank 90 % full) and the following basic equipment: filled water tank (with reduced water tank volume for the journey, see technical data), 100 % filled gas bottle with 2.8 kg filling.

The total mass and the axle weights must not be exceeded as a result of personal items, passengers and optional equipment. Installing optional equipment increases the unladen weight of the vehicle and reduces the payload by the stated weights.
